

Stainless Steel Braided Clothes Washer Hoses

EASTMAN®

Washing Machine Connectors

Help Prevent Floods

Laundry Room Safety & Peace of Mind

Rubber hoses eventually lose strength and non-stainless metal connectors will rust and deteriorate over time. In both instances, serious flooding can be the result. A typical washer hose can pump 650 gallons of water per hour into a home. This will cause catastrophic damage in a short amount of time.

Select Eastman Connectors to help prevent costly floods.

Professional grade hoses—with 90° connectors that maximize space in the laundry room—are the best choice. They solidly deliver the quality and confidence that only stainless steel can provide.

Each Year In-home Flooding Causes Damages Exceeding \$170,000,000

A Single Washing Machine Flood Costs Between \$6K & \$18K For Repairs

6' Hot & Cold 2 Pack
